Who should attend?

All neurosurgical residents are invited to participate in the workshop. We aim to provide hands on experience in the most frequent anterior and posterior cervical procedures as well as getting to known current instrumentation procedures from most current medical suppliers.

Program February 1 2019

08:30-09:00 Welcome and coffee

09:00-10:30:
- Anterior decompression: approach, discectomy and corporectomy.
- Anterior stabilization: fusion or prosthesis?
- Posterior decompression techniques: laminectomy, foraminotomy.
- Posterior fusion techniques: laminoplasty, subaxial spine and craniocervical.
